

WARP

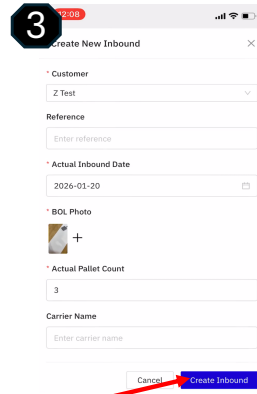

BTTR Inbound SOP

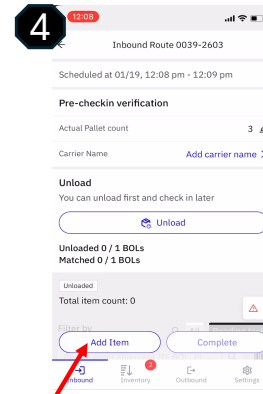

Click the three dots on the Inbound tab of the Warehouse App and Click the "Create BTTR Inbound" Option.

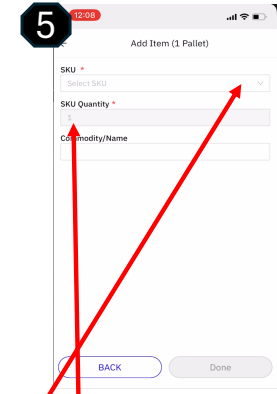

Fill out Inbound form. (If do not have the BOL, take photo of pallets).

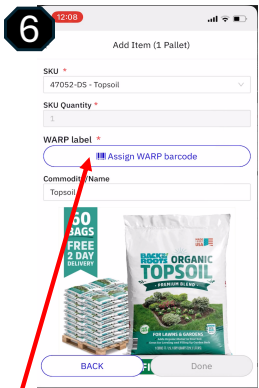

Click "Create Inbound"

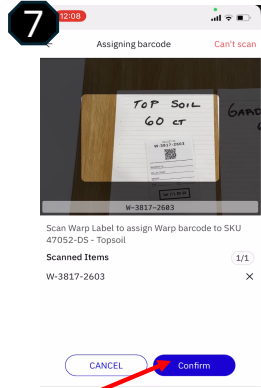

Click the "Add Item" Button

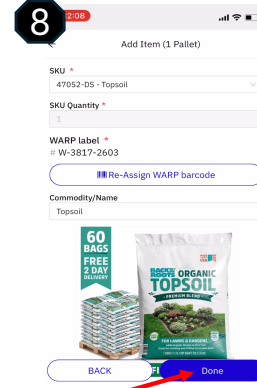

Select the correct SKU from the drop down as well as select the quantity.

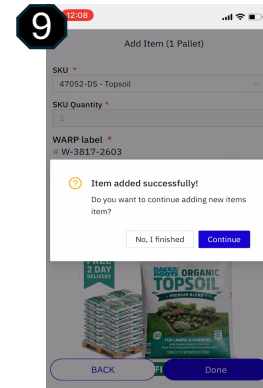

Click "Assign WARP Barcode" and scan a barcode for each pallet. (You must scan the same number of barcodes you entered in the SKU Quantity field)

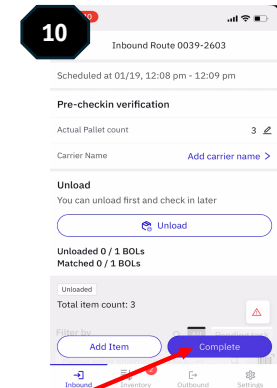

Apply Blank WARP Label to Pallet, Scan Label, and Click "Confirm".

Review Item Info and Click "Done".

Click "Continue" to add the next Item. (Repeat Steps 5-8 for the next pallet.) If you would like to stop there, click "No, I finished".

After Clicking "No, I finished", Review the inbound pallets and Click "Complete".
